HOBBIES

- Music: Just like team sports, music is all about teamwork. As I studied music for more than 10 years and have been a part of several bands and choirs, I was able to witness first hand the paramount importance of teamwork, and what we can achieve as a team.
- Fiber Arts: I like the DIY philosophy, so I enjoy the process of learning and creating things by myself and understanding the construction process. This has been crucial in my journey to become a better learner and towards accepting that it takes a considerable amount of time and effort to master a craft, whether it be knitting or programming.
